## DOGA SCHOOLS

To whom it may concern,

This letter of recommendation is provided at the request of *Surenur... Solmaz*..... who has asked me to serve as a reference on his/her behalf. I have known *Surenur... Solmaz* from the Physiology-Molecular Biology and Genetics Training Camp Programme. The student participated in our 12 hours Applied Physiology-Molecular Biology and Genetics Training Programme in 7-8 May 2016 in Avcılar/Acibadem Doga Schools.

In this camp programme students did many physiology tests with using Lab Tutor Teaching Suite. Students were intuitively guided through exercises, navigating from objectives and background information, to measurement and evaluation of physiological data, through to final analysis and report. Students dissected the organs such as heart, lung, brain and they established a connection between anatomy and physiology of these organs.

Besides, students tried many genetic tests about current issues in Molecular Biology and Genetics.

*Surenur... Solmaz*'s multi-dimensional perspective on analyzing the physiological data and his/her not hesitating to ask questions while discussing were what made him/her the rare student. He/She worked so hard that he improved his/her quizzes scores to the extent that he almost achieved an overall grade of 10/10.

I have confidence in *Surenur... Solmaz*'s abilities and I believe he/she will be a successful student in the Biology/Medicine programmes for which he/she is applying. I strongly recommend *Surenur... Solmaz*... for admission to your university.

Please do not hesitate to inform if you want to contact with me.

Sincerely,

Muhammet KILIÇÖZ

Head of the Biology Department
